Meyrin, 30/05/2018

To Dr. Susana Cabrera
Instituto de Física Corpuscular
Parque Científico, C/Catedrático José Beltrán, 2
E-46980 Paterna, Spain

I hereby certify that Pablo Martínez Agulló has spent the period from 01/03/2018 to 30/04/2018 at CERN performing research work on the refurbishment of the online monitoring for the alignment of the ATLAS inner detector.

Since October 2017 I am convener of the ATLAS inner detector alignment group, where Pablo has shown regularly his results. During his stay at CERN Pablo has accomplished a significant streamlining of the code. The work of Pablo is of primordial importance for the data-taking alignment operations of the ATLAS detector.

If you have any further questions, please do not hesitate to contact me.

Yours sincerely,

Stefano Camarda
